Chili Cookoff and Portfolio Presentation Architecture Club 2009-2010

Chili Cookoff and Portfolio Presentation Architecture Club 2009-2010

The Architecture Club at their meeting on October 16th held the first annual Architectural Faculty Chili Cook-off and transfer presentation. The three full time faculty in the architecture program each prepared chili for the competition. Catherine McGuire prepared a beef chili, David Freeman a turkey chili and Paul Pilon a vegetable chili.

The three faculty members all presented the different transfer opportunities in the architecture curriculum during the judging. David Freeman presented an overview of transfer options, Catherine discussed the role of the portfolio in transfer and different ideas and Paul Pilon discussed his transfer experience coming from Dutchess Community College to Virginia tech.

The judging for best Architecture Faculty Chili occurred at the end of the meeting with Catherine McGuire the winner.

DIA Trip

Architecture Club 2009-2010

On October 8th 23 members of the Architecture Club visited DIA: Beacon. The members were joined by Catherine McGuire, Paul Pilon and David Freeman, Architectural Faculty and advisors to the club. After a picnic lunch under beautiful fall skies the club toured the museum. DIA:Beacon is housed in the former Nabisco Factory. The students were able to observe and study both the architectural spaces created by the conversion as well as the sculpture.

Arlington High School
Construction Trip
Architecture Club 2009-2010

On September 28th 21 Architecture Club Members and second year Architectural Technology and Construction Technology students toured the construction site at Arlington High School in LaGrange. The students met with Peter Elder, a former architecture student at Dutchess Community College and Project Manager at the site for Ferrari and Sons Contractors. Peter introduced the students to the project in the company's construction trailer and then led a 2 ½ hour tour of the site. Students were able to see firsthand different methods of construction. Peter talked about the various roles of the contractors, architects and construction managers on the site and the issues that came up during construction and how they were dealt with.

Arlington High School Construction Trip

As Peter Elder repeated the best experience an architecture or construction management student can have is to get out and see construction hands on and experience a construction site.

The tour was arranged by David Freeman, a faculty member in the architecture program.

New York City Trip
Architecture Club 2009-2010

On November 5th the Architecture Club took their annual trip to New York City. In the morning the students divided into two groups with architecture students touring the A.I.A. Center for Architecture in Greenwich Village and the Museum of Modern Art.

The construction students received a tour of a 24 story office building under construction in Queens.

In the afternoon the students joined back up and toured New York Institute of Technology at Columbus Circle in Manhattan. The students were lead on the tours by faculty members Catherine McGuire, Paul Pilon and David Freeman and by Associate Dean Dominick Giarraputo.

Women in Architecture Lunch
Architecture Club 2009-2010

DCC Woman in Architecture and Construction, a subgroup of the Architecture Club, organized by faculty member Ms. Catherine McGuire met in November for the fifth annual luncheon. This year the luncheon's guest speaker was Ms. Kim Ryan, AIA an associate with the award winning Poughkeepsie firm, Liscum McCormack VanVoorhis, LLP. Ms. Ryan presented a recent hotel project designed by her firm. She discussed the design and project management aspects of the project. The group also had a lively discussion on education, licensing and internship, wherein Ms. Ryan fielded numerous questions about the profession.

Catherine McGuire, faculty member and registered architect in the DCC Architecture Program, hosted a workshop for Girl Scout Troops 41 and 20 of Wappingers Falls as they learned about architecture to earn their Architecture and Environmental Design Badge. Catherine taught the girls about the design and drafting through a project to design a Girls Scout camp with a lodge and a cabin designed by each scout.

Students Diana Gutierrez and Frank Searching of the DCC Architecture Club assisted the scouts with drawing and computer drafting.

The Architecture Club is working with Hudson River Housing to prepare architectural background drawings of existing conditions of 29 Conklin Street in the City of Poughkeepsie.

As part of the project club members met at the site where they learned how to measure existing conditions from Club advisors and Architecture Faculty Paul Pilon and David Freeman. 29 Conklin Street is a burned out building which Hudson River Housing will be repairing and renovating as part of their mission to bring affordable housing to the City.

The students will continue their service project by preparing drawings for use by the architect for the project.
